

**HIGHER EDUCATION CHALLENGE GRANTS
PROGRAM SUMMARY -- FY 2007**

**Higher Education Programs
Science and Education Resources Development
Cooperative State Research, Education, and Extension Service (CSREES)
U.S. Department of Agriculture**

Launched in 1990, the Higher Education Challenge Grants program is administered by the USDA Office of Higher Education Programs under the authority contained in section 1417(b)(1) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3152(b)(1)). This program is designed to stimulate and enable colleges and universities to provide the quality of education necessary to produce baccalaureate or higher degree level graduates capable of strengthening the Nation's food and agricultural scientific and professional workforce.

The purpose of The Higher Education Challenge (HEC) Grants Program is to strengthen institutional capacities to improve teaching programs in the food and agricultural sciences or in rural economic, community and business development, including curriculum, faculty, scientific instrumentation, instructional delivery systems, and student recruitment and retention, to respond to identified State, regional, national or international educational needs.

Projects supported by the Higher Education Challenge Grants Program should: (1) address a State, regional, national, or international educational need; (2) involve a creative or nontraditional approach toward addressing that need that can serve as a model to others; (3) encourage and facilitate better working relationships in the university science and education community, as well as between universities and the private sector, to enhance program quality and supplement available resources; and (4) result in benefits that will likely transcend the project duration and USDA support.

Funded projects should address one or more of the following educational strategies: (a) curricula design and materials development; (b) faculty preparation and enhancement for teaching; (c) instructional delivery systems, (d) student experiential learning, or (e) student recruitment or retention. Also in 2007, all projects had to address one of six Priority Areas (reference Table # 2, below, for complete description).

Applications may be submitted by (a) U.S. public or private nonprofit colleges and universities offering a baccalaureate or first professional degree in at least one discipline or area of the food and agricultural sciences; (b) land-grant colleges and universities (including land grant institutions in the Insular Areas); (c) colleges and universities having significant minority enrollments and a demonstrable capacity to carry out the teaching of food and agricultural sciences; and (d) other colleges and universities having a demonstrable capacity to carry out the teaching of food and agricultural sciences.

For the FY 2007 award cycle, \$5,094,788 was available for project grant awards after subtracting administrative costs.

A total of 43 different institutions from 34 states submitted 80 proposals requesting \$19,469,392. In April 2007, a 28-member peer review panel evaluated these proposals. The peer panel included faculty and administrators from land grant and non-land grant colleges and universities and practitioners from the food and agricultural sciences community.

Funds were available to support a total of 19 awards from 15 institutions in 13 states. Ten projects were formal Joint Project Proposals requiring partnerships and sharing of grant funds between two or more institutions.

The following tables summarize this year's Higher Education Challenge Grants program competition:

TARGET ACADEMIC EMPHASIS AREAS	NUMBER OF PROPOSALS		AMOUNT OF FUNDS	
	Requested	Awarded	Requested	Awarded*
Animal Sciences	3	1	\$832,209	\$460,787
Conservation (Including Nat. Res.& Forestry)	16	2	\$3,405,008	\$ 718,787
Family/Consumer Sciences	2	2	\$500,919	\$ 466,453
Food Sciences & Nutrition	10	2	\$1,931,364	\$ 322,614
Agricultural Social Sciences	10	2	\$2,988,586	\$927,924
International	3	2	\$387,048	\$252,345
General **	21	3	\$6,282,053	\$1,345,281
Plant & Soil Sciences	4	0	\$916,908	\$ 0
Veterinary Medicine (V)	3	1	\$798,373	\$139,665
Related Biological Sciences (Biotechnology...etc.)	8	4	\$1,426,924	\$460,932
TOTALS	80	19	\$19,469,392	\$5,094,788

* Not all projects request the maximum funds allowed per institution under this grant (\$150,000 - Regular Proposals, or \$500,000 - Joint Project Proposals. These amounts represent the total Federal dollars awarded to each lead institution, including the funds that will be subcontracted to collaborating institutions for joint projects. With fund transfer restrictions taken into account, no single institution will receive more than \$150,000 (Regular proposals) or \$250,000 (Joint proposals). All funded projects in this grants program require 1:1 non-Federal matching funds. Matching funds are not reflected in these Federal award amounts.

** Projects coded as "General" typically focus on a particular educational strategy (i.e., recruitment and retention) more than a specific discipline.

**Table 2. FUNDS AWARDED BY PRIORITY AREAS
FY 2007 Higher Education Challenge Grants**

PRIORITY AREAS Referenced in FY 2007 Request For Application Document	NUMBER OF PROPOSALS*	AMOUNT OF FUNDS*
(a) animal or plant biosecurity	5	\$1,623,149
(b) new, bio-based products and technologies	4	\$ 783,516
(c) healthy food choices and lifestyles, and obesity	2	\$ 322,614
(d) human sciences that address rural youth, family and community well-being	1	\$ 139,067
(e) forest and rangeland health and protection including improved soil, air, and water quality; or	2	\$ 718,787
(f) globalization of agricultural business, markets and trade	5	\$1,507,655
*TOTALS (Projects may actually address multiple priority areas; these numbers reflect the dominant classification.)	19	\$5,094,788
